

IP 2124 Frontlit Banner Matt is a premium coated banner material featuring excellent thermal welding characteristics. This material has been specifically designed for digital printing on large-format inkjets and is suitable for printing with eco solvent and solvent inks as well as latex and UV-cured inks.

## IP 2124

IP 2124 is a flexible, digital frontlit banner material which allows first class printability as well as a high opacity. The product is made of a top quality coated banner material, soft but extremely strong. It can be used for indoor and outdoor applications such as construction sites, posters on fairs and events, in showrooms, promotions and many other applications. This material has been UV-stabilized and features an anti-fungus treatment what extends the outdoor durability. Welding creates very good and nice seams.

To allow a professional assembling or if a banner welding machine is not available, IP 2124 offers impressive solid results if used in conjunction with ImagePerfect™ Seam Tack Tape. Laminate: ImagePerfect™ water-based liquid laminate with UV protection.

Specifications	
DESCRIPTION	Frontlit banner
COLOUR	White matt
THICKNESS	520μ
WEIGHT	550g / m <sup>2</sup>
ADHESIVE	N/A
ADHESIVE STRENGTH	N/A
RELEASE PAPER	N/A
TEMPERATURE RANGE	-20°C to +70°C
DURABILITY (UNPRINTED)	Up to 5 years
FLAME RETARDANCY	N/A
TOP COAT	Acrylic
TENSILE STRENGTH	2300 / 2100 (N / 5cm)
TEAR RESISTANCE	300 / 300 (N)
SHELF LIFE	6 months, 20°C / 50% humidity
RECOMMENDATION	For optimum quality, please ensure that the media feed adjustment has been completed for this material
